Amir Zeb

Full-Stack MERN Developer

amirzeb695@gmail.com | +923425557314 | Portfolio | LinkedIn | Github
Karachi, Pakistan

Profile

Full Stack Developer with 5 years of hands-on experience in building and maintaining modern web applications across ERP systems, SaaS e-commerce platforms. Specializes in the MERN stack (MongoDB, Express.js, React.js, Node.js) with production experience in Next.js, NestJS, TypeScript. Skilled in designing scalable API architectures, optimizing database performance, and delivering efficient full-stack solutions. Mentored junior developers, led small teams, and collaborated within agile environments. Proven ability to own features end-to-end — from database schema to production deployment — in fast-moving onsite and hybrid environments. Passionate about clean code, continuous learning, and developing high-performance applications that drive business success.

Technical Skills

Languages: JavaScript, TypeScript, HTML5, CSS3

Frontend: React.js, Next.js, Vue.js, React Native, Redux Toolkit, Redux Saga, Tailwind CSS, MUI, Chakra UI, Ant Design, Bootstrap, SCSS, Postcss, PWA

Backend & APIs: Node.js, Express.js, NestJS — REST API design, authentication (JWT), role-based access control (RBAC), cron job scheduling, API documentation with Swagger

Databases: MongoDB, MySQL, PostgreSQL — schema design and query optimization

DevOps: Docker, Kubernetes

Maintenance & Integration: Refactoring and optimizing existing codebases, revamping legacy features, integrating new functionality and third-party APIs into production modules

AI / Prompt Engineering: Building LLM-powered features (Ollama integration, prompt design), GitHub Copilot-assisted development

Payments & Integrations: Stripe, Clover

Tools & Platforms: Git, Postman, Firebase, Copilot, Jira, Trello, Asana, WordPress

Design: Adobe Photoshop, Adobe Illustrator, Canva (Figma/XD-to-code conversion)

Currently Exploring: Python, FastAPI (reference repos: python-playground, fastapi-playground)

Experience

Software Engineer

Aug 2024 – Dec 2025

Fascom | Onsite | Karachi, Pakistan

- Developed and maintained a multi-module ERP system, owning 5+ core modules including Authentication, RBAC, Cron Jobs, and reporting dashboards.
- Designed and implemented 100+ RESTful APIs enabling seamless data flow across ERP services and third-party integrations.
- Mentored 4 junior developers through code reviews, pair programming, and best-practice workshops, reducing review cycle time noticeably.
- Optimized database queries and API response times, achieving significant performance improvements in high-load ERP modules.
- Troubleshot and resolved integration and performance issues, maintaining system uptime and reliability across production environments.

Full Stack Developer
May 2024 – July 2024

Kdyslab | Project Based | Karachi, Pakistan

- Built and maintained full-stack web applications using Mongo DB, MySQL, React.js, Next.js, Express.js, Nest.js, and Node.js.
- Designed scalable APIs and optimized database structures.
- Guided 5+ junior developers on coding standards and project structure, ensuring on-time delivery within a project-based engagement.

MERN Stack Developer
July 2023 – Feb 2024

ITVerticals | Onsite | Karachi, Pakistan

- Implemented a comprehensive discount engine for a SaaS e-commerce platform, supporting 3+ discount types including user classification, industry affiliation, and coupon codes.
- Refactored and optimized MongoDB schema, reducing query execution time and improving overall platform performance.
- Reviewed and improved code quality across multiple sprints, cutting bug recurrence through systematic refactoring initiatives.
- Mentored 5 junior developers through structured code reviews and one-on-one guidance, strengthening team adherence to coding standards.
- Actively participated in agile sprints and Scrum ceremonies to enhance team efficiency.

MERN Stack / Mobile App Developer
Feb 2022 – Jul 2023

Invention and Innovation | Hybrid | Karachi, Pakistan

- Worked across multiple frameworks and platforms including React.js, React Native, Vue.js, Next.js, Node.js, Express.js, Mongo DB, and WordPress.
- Delivered full-stack web and mobile applications from development to deployment.
- Collaborated closely with cross-functional teams to ensure seamless project delivery.
- Guided junior developers on code architecture and project structure, supporting their onboarding and growth.

Web Developer
July 2021 – Jan 2022

DiscoverItech | Onsite | Karachi, Pakistan

- Converted Adobe XD and Figma designs into pixel-perfect, responsive websites using React.js, WordPress, HTML, CSS, JavaScript, Bootstrap, and jQuery.
- Ensured cross-browser compatibility and optimal performance on all devices.

Project

Erp *2025*

- Designed and developed key ERP modules including Authentication, Authorization, role-based access control (RBAC) and Cron Jobs.
- Built custom APIs for module integration and third-party connectivity.
- Implemented role-based access control and interactive reporting dashboards.
- Optimized system performance and ensured data consistency across services.

CommercePad *2024*

- Implemented a comprehensive discount strategy, supporting user classification, industry affiliation, incentive programs.
- Revamped cart functionality.
- Seamlessly integrated the coupon system to ensure cohesive and effective discount functionality.
- Created dynamic content templates for localized pages.

Docker & Kubernetes Guide For Beginners *2026*
Open Source | github.com/amir-zeb/docker-and-kubernetes-with-nextjs

- Authored a comprehensive GitHub README guide on Docker and Kubernetes targeting junior frontend developers using Next.js.
- Implemented Docker Compose, Nginx reverse proxy, and load balancing across scaled container instances.

Ai English Mentor | Next.js, Typescript, MongoDB, Ollama, Prompt Engineering *2026*
Open Source | github.com/Amir-zeb/ai-english-mentor

- A conversation-practice web app that lets users chat with an AI mentor to build English speaking confidence, with real-time fluency scoring on every message.
- Offers two distinct mentor personas — a casual mentor focused purely on confidence-building, and a professional mentor that gives direct feedback on grammar, word choice.
- Includes speech-to-text and text-to-speech so users can practice speaking and listening, not just typing.
- Provides a "suggest a reply" feature so users are never stuck mid-conversation.
- Tracks progress over time on a dashboard, showing fluency trends and practice activity per mentor

Education

Bachelor of Computer Science *2021*
Iqra University – Main Campus | Karachi, Pakistan

Languages

- **Urdu:** Fluent
- **English:** Professional working proficiency
